## DETAILED ACTION

### *Specification*

1. The abstract of the disclosure is objected to because term "from DC to 1000 Hz" [line 8] does not seem correct. It should have been "50 Hz to 1000 Hz" to be consistent with earlier disclosed. Correction is required. See MPEP § 608.01(b).

2. The disclosure is objected to because of the following informalities:

- Page 8 is missing;
- On page 11, line 17, "DC supply" should be changed to --AC supply-- to be consistent with figure 12 of the drawing.

Appropriate correction is required.

3. Claims 10 and 27 are missing. The claims have been renumbered according to Rule 1.126. Therefore, in the instant application claims 1-31 have been considered.

4. Claims 16 and 31 are objected to because of the following informalities: term "DC to 1000Hz" appears to be incorrect. Appropriate correction is required.

### *Priority*

5. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file. However, the content of page 8 of the specification is duplicated the content of page 6. Clarification is required.

### *Allowable Subject Matter*

6. Claims 1-15 are allowed.

7. Claims 16-31 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Art Unit: 2832

The following is a statement of reasons for the indication of allowable subject matter: claims 1 and 16 disclose inter alia, *integral cooling fins comprising the soft isotropic composite material projecting from an external surface of said core.*

The references of record do not teach or suggest the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Derp et al. [US 5058655] ; Takana et al. [US 6202738] ; Suzuki [JP 408222442A].
